EDUCATION

Morris County School of Technology ▫ Denville, New Jersey — September 2023 - June 2027
Academy of Computer & Information Sciences — ***GPA:4.5***
Awards: International Computer Science Competition Finalist, Top 20 Garden State CTF, Top 20 picoCTF, NJTSA Software Development 4th Place
Dual Enrolled Coursework: Computer Programming I & II, Introduction to Data Science, Data Structures & Algorithms, Analytic Geometry & Calculus I & II, Probability & Statistics, Economics I Macroeconomics, English Composition I & II, Stress Management

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, R, HTML, CSS
Tools: Git, FastAPI, Flask, React Native, Expo, PostgreSQL, Supabase, pandas, NumPy, Linux, WPILib, VS Code, REST APIs, CLI

EXPERIENCE

Vise Technologies Inc ▫ Remote — June 2026 - Present
Quantitative Research Intern
● Conduct **quantitative research** on portfolio construction and market analysis for a **FinTech** advisory platform
● Prototype and evaluate **data-driven models** and tooling to inform **systematic investment decisions**

FIRST Robotic Competition (FRC) ▫ Denville, New Jersey — June 2025 - Present
Team 8588 Lead Programmer
- Lead the robot's **software architecture**: control systems, sensor integration, and motion planning
- Coordinate **25+ programmers** via delegation, **code reviews**, and mentoring; wrote API and onboarding docs

Kumon ▫ Mount Olive, New Jersey — June 2025 – September 2025
Tutor
- Taught foundational **math and grammar** to elementary students with customized lesson and exam-prep plans

Grassroots Referee ▫ New Jersey — October 2021 – Present
Referee
- **Officiate youth soccer matches**, enforcing rules and ensuring fair, safe play for players and spectators

PROJECTS

Claude Trading Agent
● Built an **automated swing-trading agent** that screens **254 large-cap stocks** weekly for trend (60-day relative strength vs. SPY) and dip signals, layers in news and social sentiment, and places **risk-managed orders** on Alpaca with P&L reporting to Discord
● Engineered a research → analyze → execute → monitor pipeline that runs **unattended** on scheduled **GitHub Actions with no server**, persisting positions to JSON and enforcing **risk rules (5% stops; max 3 positions at 20% equity each)**
Stack: Python, pandas, NumPy, alpaca-py, Groq (Llama 3.3 70B), Claude API, GitHub Actions, Discord webhooks

Tavio
● Developed a **REST backend** that makes restaurant discovery and menus **accessible for blind and visually impaired users**, returning the **top three matches** scored against cuisine, dietary, allergen, spice, price, and travel-time preferences
● Designed the **recommendation engine** as a tunable weighted blend of per-dimension match functions and composed **Google Places** (discovery) with **Google Routes** (travel time) behind a strict **Pydantic data model**
Stack: FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Google Places API, Google Routes API, Python

Teddy Bear Clinic
● Built the **public website and registration hub** for a Morris County 501(c)(3) that has served **250+ children**, using server-rendered **Flask/Jinja** for fast, build-free hosting a volunteer team can maintain
Stack: Python, Flask, Jinja, HTML, CSS, JavaScript
